Table: Performance Test Results (JMeter)

Module / Transaction	Requests Executed	Avg. Response Time	Min Response	Max Response	Result	Remarks
Admin Login Page	3	916 ms	193 ms	2,356 ms	Fast after first load	Passed
Admin Dashboard	3	3,792 ms	3,409 ms	4,070 ms	Slowest page; heavy data retrieval (about 317 KB)	Passed
Survey Records (Admin)	3	1,831 ms	1,687 ms	1,942 ms	Moderate; large page (about 321 KB)	Passed
User Accounts (Admin)	3	1,492 ms	1,382 ms	1,596 ms	Moderate	Passed
Offices Management (Admin)	3	1,787 ms	1,697 ms	1,927 ms	Moderate	Passed
Admin Reports	3	1,438 ms	1,361 ms	1,590 ms	Moderate	Passed
Office Dashboard	3	967 ms	914 ms	1,004 ms	Fast, stable	Passed
Office Approvals	3	718 ms	709 ms	727 ms	Fast, stable	Passed
Office Report	3	904 ms	858 ms	947 ms	Fast, stable	Passed
Client Login Page	3	73 ms	68 ms	81 ms	Consistently fast	Passed
Client Survey Page	3	1,504 ms	1,458 ms	1,587 ms	Moderate; large page (about 366 KB)	Passed
Client Profile API	3	308 ms	286 ms	325 ms	Fast	Passed
Client History API	3	553 ms	541 ms	567 ms	Fast	Passed

The table shows the results of the performance test of cqacapstone.me, carried out with Apache JMeter 5.6.3 to determine the speed and stability of each module. Each transaction was executed three times by a single user, with a one-second pause between requests. A transaction is marked **Passed** when all of its requests returned HTTP 200 with the expected page content. Pages behind login were tested using an authenticated session, because the login form is protected by reCAPTCHA; the login pages themselves were measured separately.
